Subject: Support Suggestion

I would like to suggest that DOE support smaller entities by holding workshops especially for them. The purpose would be to share specific information that would help the smaller entities understand the process better and show them how they can partner with primary storm water managers. The workshops could pass out check list and go step by step to help those of us who do not know a CESCL from a NPDES.

We smaller entities need to be encouraged to comply by having a supportive overseer.

Washington State Department of Health did this when the Safe Drinking Water Act regulations were passed from the Federal Government to the State Governments. By holding a series of workshops to help the smaller entities understand what, where and when, the compliance process went smoother.
